

## SteriPEN™ Journey<sup>LCD</sup>

Handheld Water Purifier By Hydro-Photon, Inc.

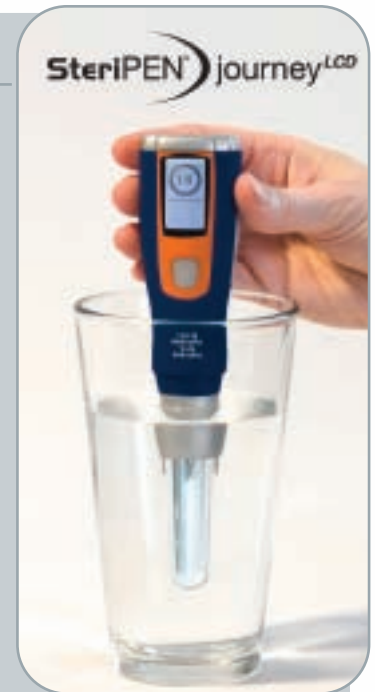

The SteriPEN is a handheld water purifier that effectively purifies water from outdoor microbes, such as viruses, bacteria and giardia; travel pathogens, such as diarrhea, dysentery and hepatitis; household germs including Bird Flu, the flu, E. coli, salmonella, staph and strep; and natural disaster and bio-terror risks, such as smallpox.

SteriPEN uses ultraviolet light to disrupt the DNA of microbes in seconds. Without such DNA, microbes cannot reproduce or make you sick.

To use, you simply push the button to activate it, place the lamp of the device in clear water to illuminate, and stir until the LCD screen indicates the dose is completed (48 seconds for 16 oz., 90 seconds for 32 oz.).

The SteriPEN Journey is bundled with a carrying case; disposable batteries. Dimensions: 7.3" x 1.6" x 1.3". It weighs 4.9 oz. and fits in commercial water bottles and canteens. The lamp can operate up to 10,000 times (up to 2,500 gallons). With rechargeable batteries, you can purify 1 liter of water for less than \$0.02 (USD). Retail price on [www.rei.com](http://www.rei.com): \$129.95.

## Nomad

### Fully Rugged handheld computer from Rugged Notebooks

The new Nomad packs even more functionality into the most powerful and full-featured rugged handheld computer available. Start with an 806 MHz processor, a long-life battery and integrated wireless capabilities like GPS, 802.11g, and Bluetooth. Then select an optional Nomad configuration that includes an integrated laser bar code scanner and color digital camera. The Nomad also features a high-resolution, sunlight-visible VGA display that shows graphics and maps in crisp detail. And it's fully rugged and just as tough as other Rugged Notebooks handhelds which means the Nomad offers a lower Total Cost of Ownership (TCO) than consumer-grade handhelds.

**Ultra rugged** - Like all TDS rugged handhelds, the Nomad meets the rigorous MIL-STD-810F military standard for drops, vibration, humidity, altitude and extreme temperatures. It also comes with an IP67 rating.

**High performance** - Every Nomad comes with an 806 MHz Marvell PXA320 XScale processor, 128 MB RAM and a hot-swappable rechargeable lithium-ion battery pack to keep going strong all day. Recharging time is significantly reduced with the use of lithium-ion batteries.

**Expansion** - A CompactFlash (CF) Type II slot and a Secure Digital (SDIO) slot add to the versatility of your Nomad. Use memory cards to increase data storage.

**Waterproof** - The Nomad is completely sealed to keep running in the wettest situations. Testing has shown that you can submerge the Nomad one meter deep in water for 30 minutes.

**Wireless communication** - The Nomad has built-in Bluetooth and optional 802.11g wireless communication capabilities.
